1. **Fix skeleton loader. Header, search, and filter sidebar should have a skeleton loader.**
2. **Another skeleton loader issue is when new results arrive, the whole section turns into skeleton loader again.**

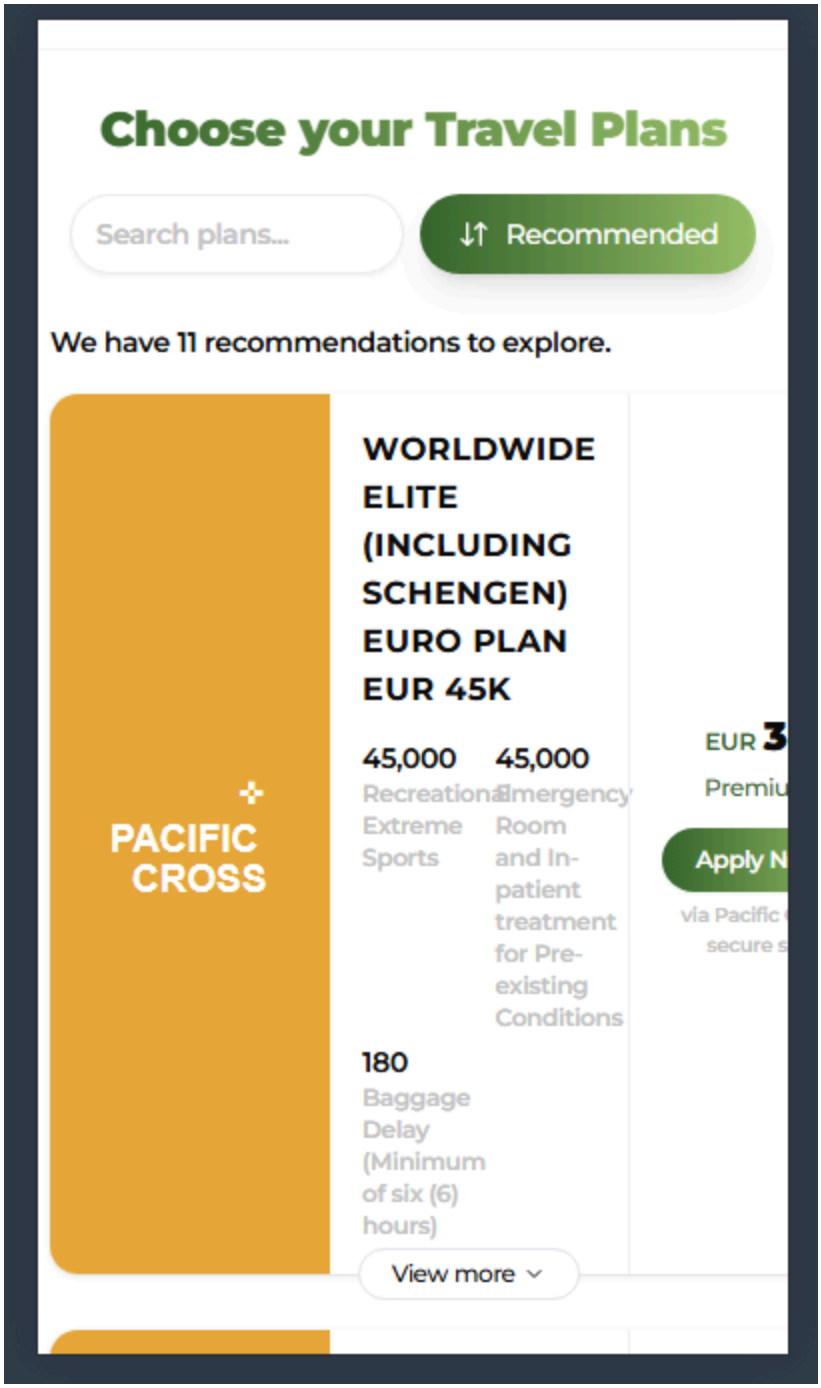

3. **Remove background color and just use the colored logo for each provider.**

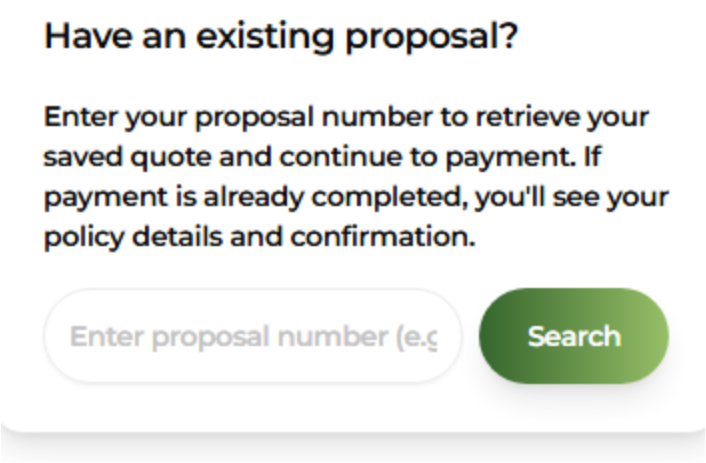

4. **Make price column same width as logo column in plan query search result**

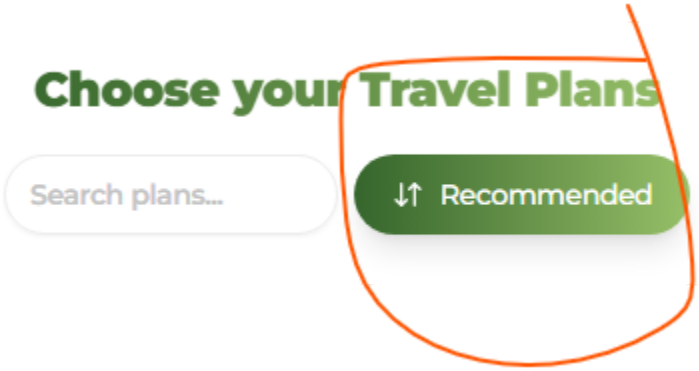

5. **Make plan query result responsive**

6. **on mobile, make proposal search input field full width and move the button to next line**

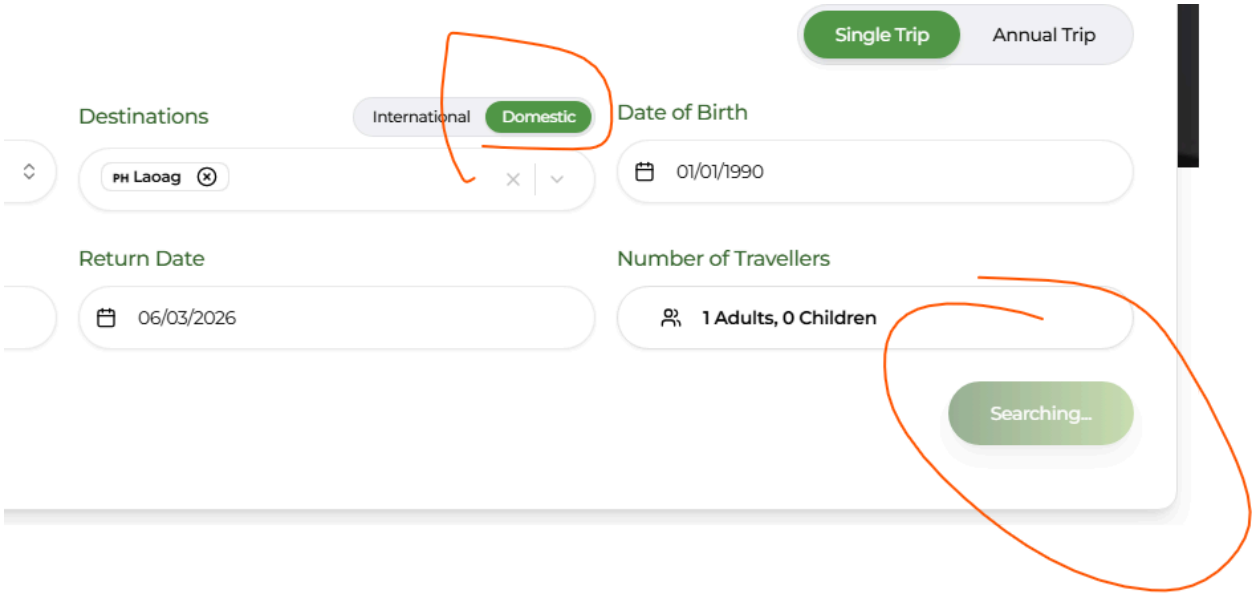

7. **Remove Recommended button**

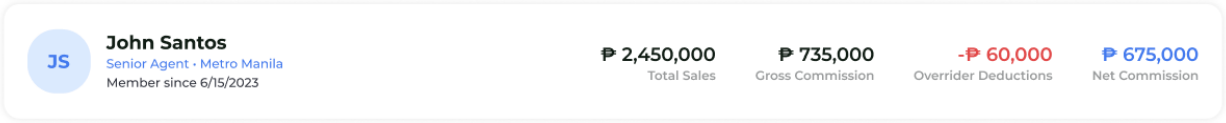

8. **Add more line height to headings. The letter “y” looks cut-off at the bottom.**

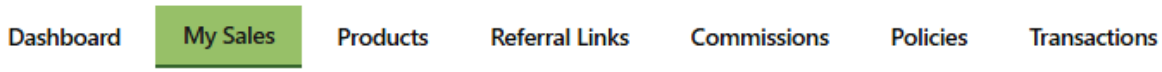

9. **In the domestic tab, the search button keeps getting stuck in disabled mode.**

10. Add back header across all affiliate pages.

11. Change nav item colors and background when hovered or active. Use #f5f5f5 with rounded corners.

12. Change policies header background color from gold to green branding.
